EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gary Jacobs on 26 August 2005.

Please replace the abstract with the following:

-- A process cartridge detachably mountable to a main assembly of an electrophotographic image forming apparatus, the main assembly including an output contact movable between an electrical connecting position and a retracted position retracted from the electrical connecting position. The process cartridge includes a movable operation member movable relative to a cartridge frame, wherein when the process cartridge is inserted into the main assembly of the apparatus, the movable operation member is engageable with a fixed engageable member fixed in the main assembly of the apparatus to move relative to the cartridge frame, and is engageable with a displaceable engaging portion of the displaceable member to move the output contact from the retracted position to the electrical connecting position; and an input electrical contact for receiving a voltage for enabling a process device by engagement with the output contact moved to the electrical connecting position.--

REASONS FOR ALLOWANCE

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2852

The claims are considered patentable because of the inclusion of the claim limitations, a process cartridge mountable to a main assembly, wherein the process cartridge includes a movable operation member engageable to move an output contact of the main assembly from a retracted position to an electrical connecting position, that is not taught by or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Related Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Takashima et al. (US 6,011,941) disclose a movable output contact member for electrically connecting a process cartridge to a main assembly.
